# How to use HeatWave Gaming webstore

Searching for products

There is two main ways of searching for products on our website, the first way is via the search bar located on the main navigation bar at the top right of the screen.

In the search bar you can search for anything related to the product you are after, the search will return products which are related to what you searched. For example typing in "Overwatch" will search all the products and find any that match the description or name of "Overwatch". You do not need to complete the word you can also use tags which may be associated with the product such as "Ow".
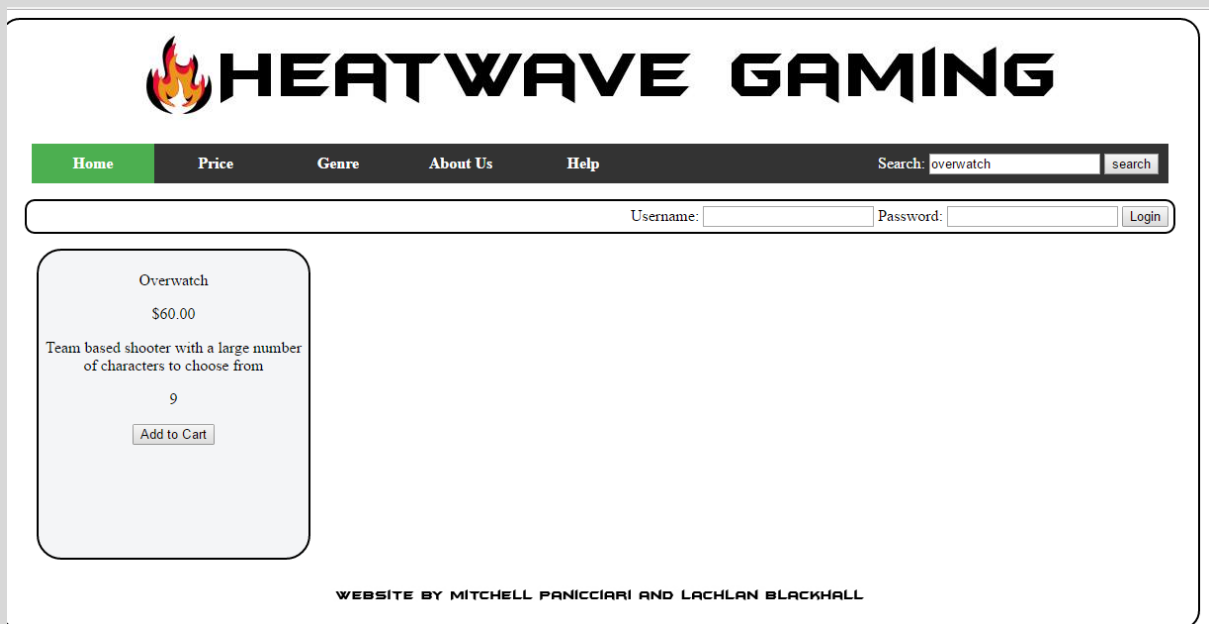

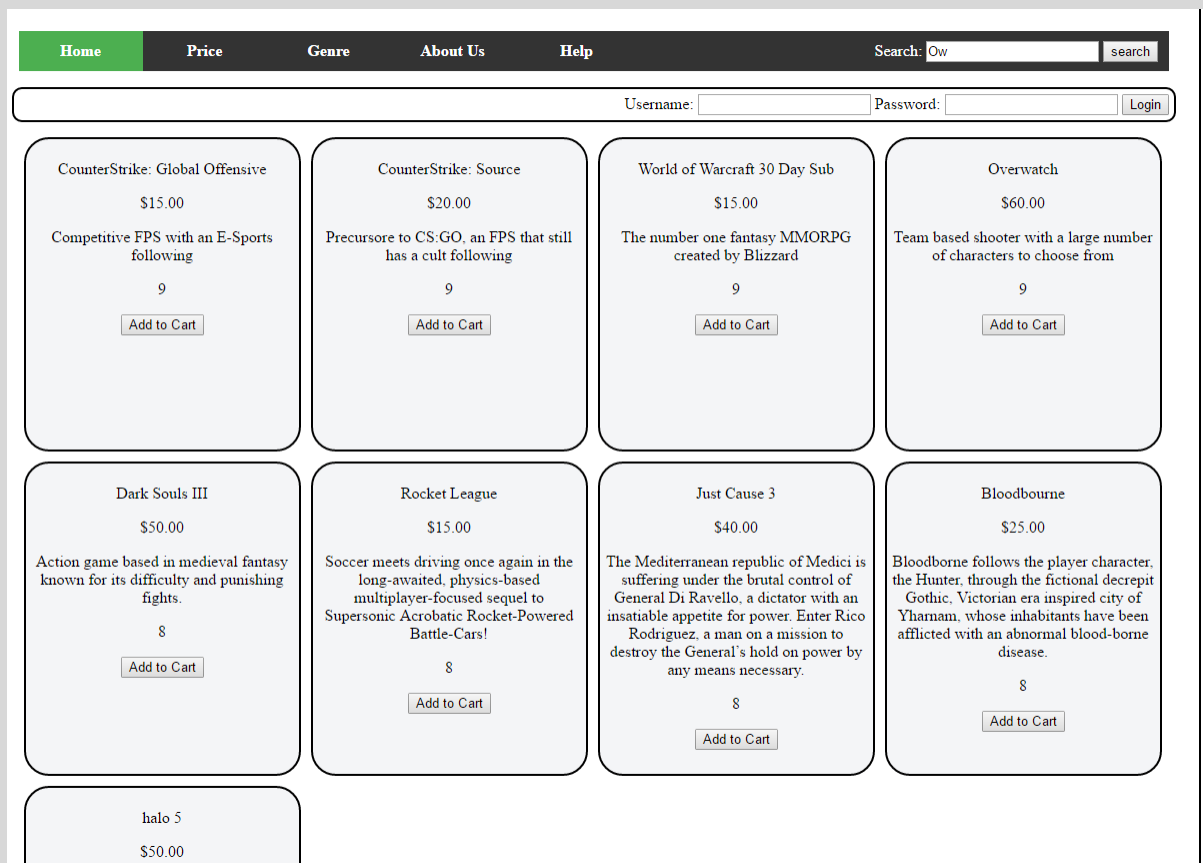

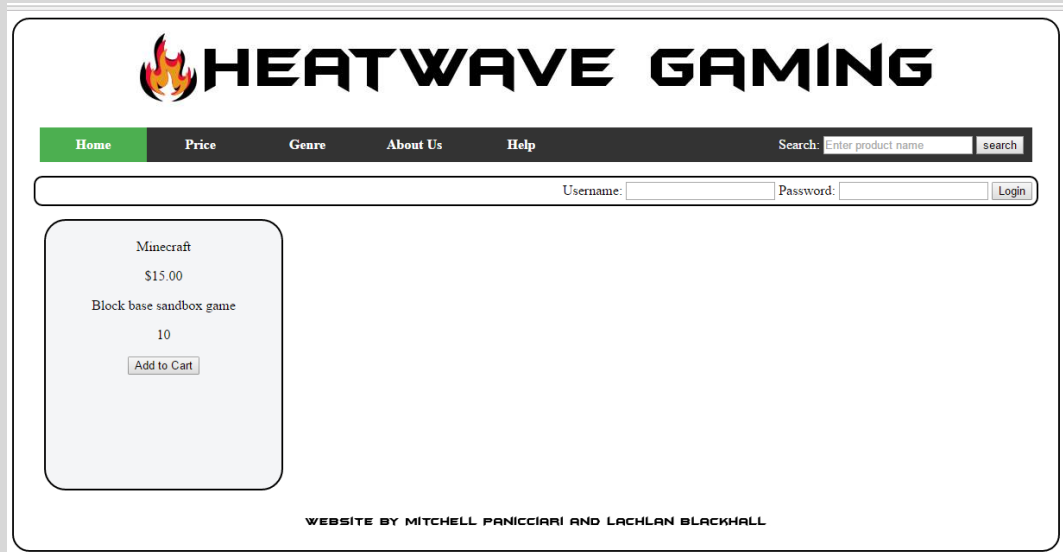

As you can see when searching for "Ow" it retrieved "Overwatch" but also any other entries with "Ow" in them.

The other way of viewing our products is using the buttons in the navigation menu when you mouse over the buttons "Price" and "Genre" a drop down menu will appear and clicking one of the buttons will display the corresponding products.
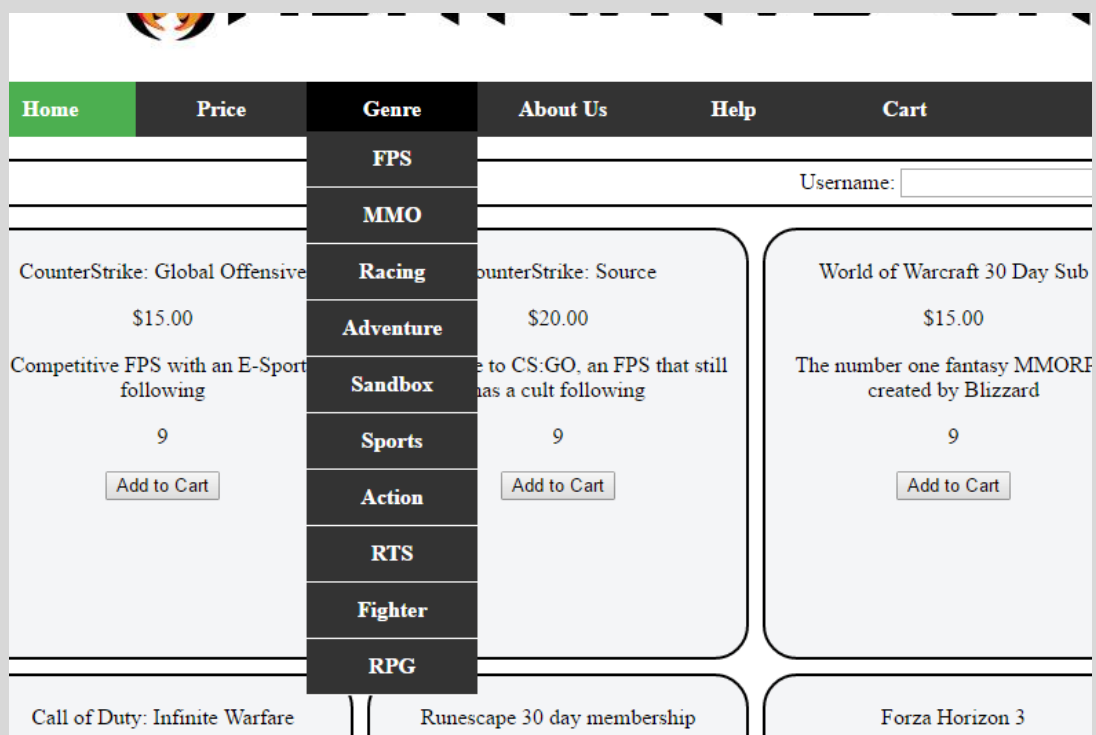

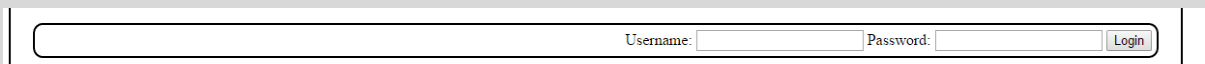

If you click "Sandbox" it will show all games within the genre "Sandbox", the same applies when using the price button it will show either Games less than $20, less than $50 or over $50 depending on the button you chose.

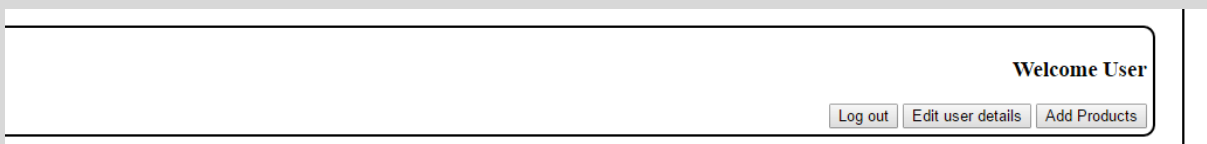

Logging in

Logging in is done through the login form which is located under the navigation bar to log in make sure that you have an account associated with yourself.

Enter in your username in the username field and enter in your password to the password field and click the login button. Upon successful login these options will now be available to you.

Logging out is done via clicking the log out button.

Back to home

Clicking the home button on the navigation menu will take you back to the first screen and will then show every single product in our range.

Editing your details

Clicking the edit user details button will bring you to a form allowing you to edit your details.

Enter in the new details and press submit.
